High School, Islamic Secondary School

September 2019 - June 2020

An-Najah National Univ., Nablus — *Bachelor's*

September 2020 - June 2024

Majoring in Computer Science, Information Technology department

GPA: 2.88

PROJECTS

AutoMentor Driving School Simulator — *Unity Project*

AutoMentor is a comprehensive driving school simulator designed to provide a realistic and educational experience for learners. It features a virtual city where players can practice driving rules, interact with AI cars and NPCs powered by multi-agent AI, and receive real-time feedback on performance. The primary objectives of AutoMentor are to enhance driving skills, ensure adherence to traffic laws, and offer a motivating environment that encourages continuous improvement.

Metal Factory — *Database System*

A well-designed database system for an existence metal factory for organizing buying and selling metals process, contribution of two CS students, we designed a friendly user interface using Android in Java.

CAREER OBJECTIVES

As a Computer Science student, I aim to gain valuable experience at top tech companies and become an active freelancer at the same time. My goal is to improve my technical skills in areas like web and mobile development. I want to join a dynamic team where I can use what I've learned and contribute to exciting projects. My aim is to become a well-rounded professional in computer science, have my own business managing tech projects and make a difference in the industry.
